

Customer Needs (Maëlle)	Being able to share between teammates	No application or Sign up to websites	Being on the Intra directly	Appealing yet simple
Key Moments (Maëlle)	Unfortunately (for now) the Todo is personal to yourself and not shareable.	Liked that there was no need to install or sign up to anything.	Big plus for accessibility reasons	A big difference between the beginning of the project.
Customer Satisfaction (Maëlle)				
Customer Needs (Eliott)	Easily findable Visually appealing	Being able to share between teammates	Link it to existing intranet projects	
Key Moments (Eliott)	Liked that there was no need to install or sign up to anything. Appealing to look at.	Unfortunately (for now) the Todo is personal to yourself and not shareable. Having to manually put the link is annoying but still having the possibility is good.		
Customer Satisfaction Eliott				

Customer Needs (Charles)	<div>Easily findable & accessible</div> <div>Save automatically and not having to save (potentially forget)</div> <div>being able to customise customise cards like he would want</div>
Key Moments (Charles)	<div>Liked the fact that it can be potentially added to the intra directly</div> <div>Unfortunate that we can only save locally Liked the fact that you can customise cards.</div>
Customer Satisfaction (Charles)
