The Problem

- Often students don't use the same planners which causes confusion between each other.

- Most planners are not optimal for Epitech Students.

- Most planners don't include details about the project, the credits, the groups etc...

Trello
Trello is a easy to use time planner. this is because of its many features. you can add custom tags and colours to differentiate the different stages of the tasks.

Unique Value Proposition

We solve the problem of having difficulties agreeing on different planning websites/applications. This extension is directly added to the Epitech Intranet, providing a planner that is custom build for Tek projects.

Customer Segments

Epitech Students
eg: Elliot, Charles, Maëlle

Early Adopters :
- Student that wants to use a planner custom made for Epitech students.
- A user that doesn't want to use different applications or websites to plan a project with this/her teammates.

Your Solutions

- Intergrate directly into the Intranet.

- Add custom information directed at Epitech students.

- Able to easily decide between what planner to use if there is ambiguity.
